About Zanco

Jahan Tasisat Diaco Pars Company has been working in the field of consulting, design, sales and after-sales services of advanced air conditioning systems since 2008 with the aim of providing services higher than the common standards in the country

Our most important goal is to achieve complete customer satisfaction and provide comfort and convenience in their homes and workplaces

In a short time, we have been able to make our name and this brand famous in Iran with American Copeland compressors made in Thailand and China. In the post-sale phase, full support in all stages of design, implementation, installation and remote work service in short-term time frames is one of the main duties of the technical department of this company

A variety of cooling and heating quality products such as chillers and mini chillers, fan coils and duct splits (Ducted split units) are part of our wide product range

We believe that honest technical and specialized services and advice regarding air conditioning systems distinguish us from other colleagues active in this sector. Our technical and engineering consulting services are provided to you in two stages before and after the sale of the equipment. In the pre-sale phase, our sales and technical engineers will guide you in making decisions and choosing the best type of air conditioning systems with advice and guidance. Providing technical and financial proposals in the form of engineering documents and drawings is one of the free services of Jahan Tasisat Diaco Pars Company

All the offered products of Zanco brand have a warranty card approved by the Consumer Rights Protection Organization and are subject to after-sales service. These services are provided by the representatives of this company in Tehran and other cities

Over the past few years, customer orientation and loyalty to commitments have formed the foundation of the company. We believe that with the increasing expectations and demands of today's smart consumers in the air conditioning industry, we are always upgrading the technical level of our products and personnel
